Trace

When you go out,
you leave footprints.

But some leaves negative impact
to the environment.

To better protect our planet and ensure sustainable
outdoor activities, we must learn about the Leave No
Trace framework.

Seven Principles of LNT

Principle 1: Plan Ahead & Prepare

Principle 2: Travel & Camp on Durable Surfaces

Principle 3: Dispose of Waste Properly

Principle 4: Leave What You Find

Principle 5: Minimize Campfire Impacts

Principle 6: Respect Wildlife

Principle 7: Be Considerate of Others

01: Plan Ahead & Prepare

1. Know the regulations (the don'ts) for the area you'll visit.
2. Prepare for extreme weather, hazards, and emergencies.
3. Avoid peak season.
4. Visit in small groups.
5. Bring a garbage bag. Avoid over-packaging food to minimize waste.
6. Use a map and compass/ digital GPS instead of flags/ paint to mark the route.

→ Meal Planning

- Prep amount of food you need & light-weight snack
- One-pot cooking
- Bring a stove: campfire may break law and exploit natural resources, leaving burned waste and potential wildfire

02: Travel & Camp on Durable Surfaces

1. Durable surfaces: established trails, campsites, rock, gravel, and dry grasses or snow.
2. Protect water zones by camping at least 60 m from lakes and streams.
3. Campsites are found, not made. Do not damage the land for camping.

In popular areas

1. Concentrate use on existing trails and campsites.
2. Walk single file in the middle of the trail, even when wet or muddy.
3. Keep campsites small. Focus activity in areas where vegetation is absent.

In undisturbed areas

1. Disperse use to prevent the creation of campsites and trails.
2. Avoid places where impacts are just beginning.

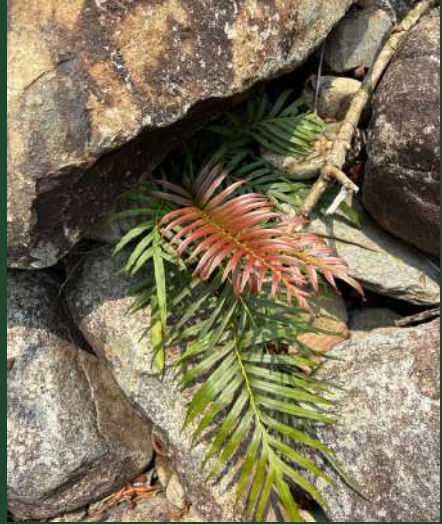

03: Dispose of Waste Properly

1. Double check your campsite and rest area for trash or spilled food. Pack out all trash, leftover food, and litter.
2. Burning trash is never recommended.
3. Deposit solid human waste in catholes dug 15-20 cm deep at least 60 m from water, camp, and trails. Cover and disguise the cathole when finished.
4. Bury toilet paper deep in a cathole or pack the toilet paper out along with hygiene products.
5. To wash yourself or your dishes, carry water 60 m away from streams or lakes and use small amounts of biodegradable soap. Scatter strained dishwater.

04: Leave What You Find

Leave them in the pictures, not your home!

1. Preserve the past: observe cultural or historic structures and artifacts, but do not touch them.
2. Leave rocks, plants, and other natural objects as you find them.
3. Avoid introducing or transporting non-native species.
4. Do not build structures, furniture, or dig trenches.

05: Minimize Campfire Impacts

1. Use a lightweight stove for cooking and use electric lamp for light.
2. Use established fire rings, pans, or mound fires where fires are permitted.
3. Keep fires small. Use only sticks from the ground that can be broken by hand.
4. Burn all wood and coals to ash, put out campfires completely, then scatter cool ashes.

06: Respect Wildlife

1. Observe wildlife from a distance. Do not follow or approach them.
2. Never feed animals. Feeding wildlife damages their health, alters natural behaviors, and exposes them to predators and other dangers.
3. Control pets at all times, or leave them at home.
4. Avoid wildlife during sensitive times: mating, nesting, raising young, or winter.

07: Be Considerate Of Others

1. Respect others and protect the quality of their experience.
2. Yield to other users on the trail.
3. Take breaks and camp away from trails and others.
4. Let nature's sounds prevail. Avoid loud voices and noises.

**You are a responsible Rambler
now. Enjoy the nature and
Leave No Trace!**
